## MISSION BACKGROUND

Seemingly unrelated and troubling events headline international news reports. Innocent civilians are gunned down in the Hielongjiang Province of China. A nuclear missile is destroyed seconds before detonating over Kazakhstan. Tensions surge between the U.S. and China when sensitive data is leaked to a dissident Chinese group.

Corrupt elements within the Agency, a super-secret U.S. intelligence group, are the driving force behind all these dangerous events. Using the biotech firm Pharcom, they developed a virus named Syphon Filter. Syphon Filter is the ultimate biological weapon and it's for sale. The buyer will become the first terrorist superpower. Agency operatives Gabe Logan and Lian Xing discovered the plot within their own organization. They are now attempting to expose the Syphon Filter conspirators and stop the sale. In response, the Agency has alerted the military and law enforcement that Gabe Logan and Lian Xing should be eliminated.

Agency motives become clearer as Gabe Logan discovers Pharcom CEO Jonathon Phagan's private files on the virus. Then Lian Xing, herself infected with Syphon Filter, is kidnapped for use as an Agency guinea pig. Gabe must find the vaccine to save Lian Xing's life as she attempts an escape from her captors.

Branded as criminals by their own government, Gabe and Lian Xing must strike with deadly efficiency while leaving innocent personnel unharmed. Ex-agent Teresa Lipan, who operates a clandestine spy network, will assist both Gabe and Lian Xing by coordinating missions from her desert base. The agents make every move knowing that a traitor could turn the knife at any moment.

# STARTING THE GAME

## MAIN MENU

### *New Game*

1. Select **NEW GAME** to begin playing *Syphon Filter 2*.
2. Select a 1 or 2 Player game.  
*1 Player mode* - Battle the terrorist threat and attempt to stop the sale of the Syphon Filter virus.  
*2 Player mode* - Gabe Logan, Lian Xing and others battle head-to-head.

### *Load Game*

Load a previously saved game. (You must be using a **MEMORY CARD** containing *Syphon Filter 2* game data in order to use this option).

## MEMORY CARD

To save or load game data, you must insert a **MEMORY CARD** into **MEMORY CARD slot 1** before beginning play. Three blocks of memory must be available on the **MEMORY CARD** in order to save *Syphon Filter 2* data. If you do not have a **MEMORY CARD**, all game data will be lost when you turn off your PlayStation game console.

*Do not remove or insert a MEMORY CARD while saving is in progress or damage may result.*

You can save during a level by choosing **SAVE AND QUIT GAME** from the Options screen. Your progress up to the last level checkpoint will be saved.

To load a saved game, access the **LOAD GAME** option on the Main Menu.

# GAME SCREEN

The game screen displays vital information for combat, weapon status and survivability.

**Armor/Health** - This meter shows the agent's armor in blue and health in red. When the agent is under attack and taking damage, the blue color drains from the meter first as the armor is weakened. If damage continues, the red drains from the meter. When the red disappears, the agent is dead and the mission fails. To protect the agent's health, pick up flak jackets from downed enemies or find them in weapon boxes.

**Danger Meter** - As the red in this meter increases, the agent's chances of being shot increase. When the meter is at the max and flashing, the agent is about to be shot. Retreat or attack the enemy.

**Target Meter** - Used in Target Locking mode to show probability of hitting an enemy.

**Timer** - Certain missions must be accomplished within a time limit. When that is the case, the Timer appears over the Radar and begins counting down.

## GAME SCREEN continued...

**Radar** - The agent position is the center of the Radar screen. Green dots are enemy positions. When a red danger cone flashes toward an enemy position, that enemy is targeting you. Retreat or attack the enemy.

**Weapon In Hand** - This is the weapon or item the agent is using. To change weapons, press and hold the SELECT button and press the L2 or R2 button. You can also cycle through weapons and gadgets by tapping the SELECT button.

**Rounds In Weapon** - This is the number of shots left in the current weapon.

**Total Rounds** - This is the total number of rounds the agent is holding for that weapon. To reload, press the ▲ button. Always check casualties for ammo.

**Status Label** - Appears near an enemy to show that person's name, his or her status (wearing flak jacket) or what body part is targeted (head shot). Also appears on weapon boxes to indicate contents, as well as on switches.

## PLAYING AS GABE LOGAN OR LIAN XING

---

Either Gabe Logan or Lian Xing will handle missions. They will also operate with Teresa Lipan as situations dictate.

## AGENT MOVES

---

Gabe and Lian Xing are highly trained both mentally and physically. They can attack with lethal stealth or calmly fire the fatal shot in the middle of a firefight. They can climb obstacles or move hand-over-hand while hanging hundreds of feet in the air.

**Move/Run** - Press the Directional button Up to run forward. Press Left/Right to turn. Press Down to move backward.

**Walk** - Lightly press the Left Stick to walk.

**180° Turn** - Tap the Directional button Down or Left Stick Down to turn around.

**Crouch walking** - Press the **X** button while moving to crouch down. Use this to keep a low profile, sneak by enemies or move through tight areas. During levels in which Gabe or Lian Xing is disguised, pressing the **X** button will make the agent walk.

**Kneel** - Press and hold the **X** button to kneel down. From this position, the agent can steady the aim of a weapon or hide behind objects.

**Forward roll** - Forward roll by pressing the **Y** button. Use this move to roll out of danger or make the agent a tougher target. Press the **X** button when coming out of a roll to finish in a kneeling position. Press the L2 or R2 button or the Directional buttons when coming out of the roll to hook to the left or right.

## AGENT MOVES continued...

**Climb up or pull up** - Get close to an object and press the **▲** button. If the obstacle is smaller than the agent, he or she will climb onto it. If it is larger than the agent, he or she will jump up, grab an edge and hang. To pull the agent up on top of an object, press the Directional button Up. Press the Directional button Down to let go and fall back down.

**Climb down** - To climb down from an object, get close to the edge facing it and press the **✕** button. If the object or the distance to the ground is taller than the agent, he or she will hang from it. Press the Directional button Down to let go.

**Jumping** - When running toward certain ledges, the agent will automatically propel himself or herself through the air and land on the other side.

**Hand-over-hand** - When hanging from something, use hand-over-hand movement by pressing the Directional button Left/Right. The agent may have to climb down or jump up to a hanging position. The agent can fire weapons one-handed while hanging in certain areas but cannot reload or change weapons.

**Strafe** - Press and hold the L2 or R2 button to run sideways while firing (**■** button) at the targets in front of you. This is useful for multiple attackers or in situations where you want to fire and dive for cover.

# USING WEAPONS

To fire a weapon, slash with a knife, or throw a grenade, press the **■** button.

## TARGETING MODES

### Target Locking

This mode is excellent in fights against multiple enemies. Press and hold the R1 button to lock on to the closest target. Press it again to switch to the next closest target.

Target locking is also highly effective when assailants are attacking from behind. By holding target lock, the agent can fire over the shoulder or backward while retreating. If the agent is using a two-handed weapon such as an M-16, target lock will stay locked on target while the agent rotates up to 180 degrees. With a single-handed weapon such as a pistol, target lock is maintained through 360 degrees of rotation.

*Note: A Status Label will appear over targets wearing flak jackets. In this case, you should switch to manual targeting and go for a head shot.*

### The Target Meter

When target locking (R1 button) is held down, the Target Meter at the top left of the screen displays the hit probability of the selected target. As the length of the Target Meter increases, your chances of hitting the target increase.

### **Manual Aiming**

This mode (hold L1 button + Directional button) provides dead-on accuracy. Sometimes a body shot won't be effective because the target may be wearing a flak jacket. Use manual aim to fire at the head. When the aiming cursor is targeted on the head, the words "Head Shot" appear above the target.

### **Default**

Fire a weapon without aiming. This is the least accurate type of firing, but also the fastest. Use this when you are in a real jam and need to get a shot off immediately. Otherwise, use the other target modes.

## **SNIPER MODE**

When using a sniper rifle, press and hold the L1 button to enter Sniper mode and then use the Directional button to zero in on a target. A sniper scope offers the highest precision shot placement possible. A display within the scope tells the shooter exactly what part of the body the shot will hit. If the sniper rifle is equipped with a Nightvision IR scope, it can detect target body heat, making hidden enemies visible.

(Use the ▲ and ● buttons to zoom the scope in and out.)

## **RELOADING WEAPONS AND FINDING AMMO**

When a weapon runs out of ammo, you hear the hammer click on an empty chamber and the ammo counter at the bottom right of the screen displays zero. The agent will automatically reload if he or she is holding additional ammo clips.

- For the quickest reloads, press the ▲ button to manually kick out the empty clip and reload.

- Each weapon has a limited amount of ammo. Familiarize yourself with the weapons by studying the Weapons section beginning on page 14.
- Always check downed enemies for ammo before moving on. When you pass over them, if there is any ammo (or a weapon) to be taken, it will display on the screen and be added to your inventory.
- Look for weapon boxes in every location. When you find ammo, it will be identified on screen and added to your inventory.

## SWITCHING WEAPONS/GADGETS

To switch weapons or gadgets:

1. Press and hold the SELECT button to display the weapons/gadgets across the top of the screen.
2. Press the L2 or R2 button to highlight a new weapon.
3. Release the SELECT button.

To cycle through the available weapons, tap the SELECT button.

*Note: You can also select weapons on the Pause/ACD screen. See page 27.*

## SHOOTING WHILE HANGING

The agents can hang from some ledges and fire (■ button) with their free hand. All the targeting modes are available while firing from this position.

# THE WEAPONS AND GADGETS

Each weapon or gadget is designed to meet specific mission objectives. The weapons are listed with statistics for rate of fire, damage potential, clip size and maximum rounds carried by the agent. Look for additional weapons and ammo on dead enemies or in strategically placed weapon boxes. Sometimes, stealth is a better weapon than firepower. A mission may fail because the agent goes in shooting. The success of the mission may depend on just a knife or no weapon at all.

## *Combat Knife*

This U.S. Marine weapon is designed for hand-to-hand combat. Use the knife when you want to eliminate an enemy quietly.
